

# WS #18 - hierarchical clustering

Monday, November 25, 2024

Your Name: \_\_\_\_\_

Names of people you worked with: \_\_\_\_\_

Name one tradition around this week's time off that you grew up with. Will you do it this year?

## Task:

Consider the distances between the following observations:

|   | A   | B   | C   | D   | E |
|---|-----|-----|-----|-----|---|
| A | 0   |     |     |     |   |
| B | 0.2 | 0   |     |     |   |
| C | 0.6 | 0.5 | 0   |     |   |
| D | 1   | 0.9 | 0.4 | 0   |   |
| E | 0.9 | 0.8 | 0.5 | 0.3 | 0 |

Start with all objects in separate “clusters” (i.e., start with 5 clusters), by merging (complete linkage) one pair of clusters at a time, provide each clustering for  $k = 5, 4, 3, 2, 1$ .

**Solution:**

$k = 4$ : Link A and B to get  $-(AB)$ , C, D, E

$k = 3$ : Link D and E to get  $-(AB)$ , C, (DE)

$$d_{(AB)C} = \max(d_{AC}, d_{BC}) = 0.6 \quad (1)$$

$$d_{(AB)D} = \max(d_{AD}, d_{BD}) = 1.0 \quad (2)$$

$$d_{(AB)E} = \max(d_{AE}, d_{BE}) = 0.9 \quad (3)$$

$$(4)$$

|    | AB  | C   | D   | E |
|----|-----|-----|-----|---|
| AB | 0   |     |     |   |
| C  | 0.6 | 0   |     |   |
| D  | 1.0 | 0.4 | 0   |   |
| E  | 0.9 | 0.5 | 0.3 | 0 |

Link D and E!

$k = 2$ : Link C with (DE) to get  $-(AB)$ , (CDE)

$$d_{(AB)C} = 0.6 \quad (5)$$

$$d_{(AB)(DE)} = \max(d_{AD}, d_{BD}, d_{AE}, d_{BE}) = 1.0 \quad (6)$$

$$d_{(DE)C} = \max(d_{CD}, d_{CE}) = 0.5 \quad (7)$$

$$(8)$$

|    | AB  | C   | DE |
|----|-----|-----|----|
| AB | 0   |     |    |
| C  | 0.6 | 0   |    |
| DE | 1.0 | 0.5 | 0  |

Link C with (DE)!

$k = 1$ : Link all to get  $-(ABCDE)$

$$d_{(AB)(CDE)} = d_{AD} = 1 \quad (9)$$
